Art. AF-02

WOOD	BEECH WOOD
WEIGHT RAW PRODUCT KG	5
WEIGHT FINISHED PRODUCT KG*	5.5

Materials in use for raw frame

- The structure is realized in wood and may have any part in plywood
- For assembly we use a non-polluting Polyvinyl acetate aqueous dispersion. We can also use screws for wood placed in inaccessible places.

Seat:

The seat is designed to be resistant.

The frame of seat is in wood and could have the wood seat / Vienna straw seat / straw seat / plywood panel / chipboard panel

Backrest:

The frame of backrest is created to be comfortable and sturdy. The frame is in wood or plywood panel.

Use instructions

- The whole frame must have legs resting on the floor
- Do not use the seat area for any inapt use (not as a step stool)
- Wood is a live product, and it could change by damp/humid or dry room conditions. Do not put the product near any heating source (fireplace, radiators, etc). Do not expose to weathers elements such as rain, direct sunlight or any weather
- Wood is a natural material, and it could present slight differences in structure and colors
- At the end of use the product must be disposed of recycle properly Do not burn, it is dangerous.

Maintenance instructions

Avoid using solvents abrasives - use a damp/humid soft cloth to clean and wax for wood.
